KPFK2U-40

PFPE high-temperature grease GLS 595/N2 H1 Halal

ELKALUB GLS 595/N2 is a high temperature grease mainly used for the lubrication of roller and slide bearings in the temperature range from -40 °C up to +250 °C. ELKALUB GLS 595/N2 is resistant to acids and alkalis as well as to organic solvents. Please note: ELKALUB GLS 595/N2 may not be mixed with other lubricants. Due to its high chemical stability ELKALUB GLS 595/N2 has been used for many years as nozzle sealing compound for adhesive machines at the end of the work process. Most important: Before applying the lubricant the surfaces have to be thoroughly cleaned as the lubricant will adhere only to surfaces free of oil, grease and dirt. Recommendation: for cleaning use ELKALUB LFC 500.

BASE OIL PFPE

THICKENER solid lubricants

VISCOSITY 360 mm²/s

OPERATING TEMPERATURE -40 °C bis 250 °C

NLGI CLASS 2

FIELD OF USE

- roller bearing
- bearings

- Fittings & O-rings
- valves

BUSINESS

- Automotive
- Food
- beverages
- Pharma & Medicine
- bearing manufacturer
- plant construction

FUNCTIONALITY

- assembly grease
- High temperature grease
- Food grease

PACKING

- 250 g tube
 - 400 g cartridge
 - 1 kg can
 - 5 kg bucket
 - 18 kg hobbock
 - 50 kg hobbock
 - 150 kg barrel
-
